

About

Date : July 1, 2014

Temperature and temperature measurement affects every aspect of our lives. Measuring the temperature of the food we eat, and ensuring its safe storage and transportation. Industrial processing of plastics and petro-chemicals used in the manufacture of goods and materials. From Health and safety, to F1 motor racing, all require accurate temperature measurement.

Our aim on this site is to provide Temperature news, Temperature information and Temperature related resources.

Much more coming soon – this site is still under development.
